

Design Agency Homepage - Next.js Developer Internship Task

Deployment Link : <https://design-model-zeta.vercel.app>

Project Status:  **COMPLETED**

Requirements Checklist

Assignment Overview

- [x] Built using Next.js 14.2.3 (version 13+)
- [x] Using App Router
- [x] Professional and clean layout
- [x] Modern design theme with light/dark mode

Hero Section

- [x] Agency name ("Design Agency")
- [x] Short tagline ("We Design Futures")
- [x] Call-to-action buttons ("View Our Work" & "Explore Services")
- [x] Background gradient with animated geometric shapes
- [x] Scroll indicator animation
- [x] Statistics bar (150+ Projects, 98% Satisfaction, 12+ Awards)

Services Section

- [x] 4 service cards with grid layout
- [x] Each card includes:
 - [x] Icon (SVG icons)
 - [x] Service title
 - [x] Description
 - [x] Technology tags
- [x] Services included:

- [x] UI/UX Design
- [x] Web Development
- [x] Brand Identity
- [x] Digital Marketing
- [x] Hover effects and animations

✓ Portfolio Section

- [x] Grid layout displaying 6 projects
- [x] Each project includes:
 - [x] Image thumbnail
 - [x] Project title
 - [x] Category label
- [x] Hover effects (image zoom & overlay)
- [x] Responsive grid (1 col mobile, 2 col tablet, 3 col desktop)

✓ Contact Section

- [x] Name input field with validation
- [x] Email input field with email validation
- [x] Message textarea with min length validation
- [x] Submit button with loading state
- [x] Success message display
- [x] Contact information display (Email, Phone, Location)
- [x] Social media links

✓ Technical Requirements

- [x] Next.js 14.2.3 with App Router
- [x] Functional components only
- [x] Separate components for each section:
 - [x] `components/Hero.js`

- [x] `components/Services.js`
- [x] `components/Portfolio.js`
- [x] `components/Contact.js`
- [x] `components/Navbar.js`
- [x] `components/Footer.js`
- [x] Proper folder structure
- [x] Responsive mobile-friendly design
- [x] Clean and readable code

Bonus Features

- [x] Tailwind CSS for styling
- [x] Smooth animations and transitions
- [x] SEO metadata implementation
- [x] Dark mode toggle (fully functional)
- [x] Image optimization using Next/Image
- [x] Custom scrollbar styling
- [x] Intersection Observer for scroll animations
- [x] CSS variables for theme switching
- [x] Geometric modern typography (Inter font)

Technical Stack

Core Technologies

- Framework : Next.js 14.2.3
- Styling : Tailwind CSS
- Typography : Inter, JetBrains Mono (Google Fonts)
- State Management : React Hooks (useState, useEffect, useRef)
- Image Optimization : Next/Image component

Key Libraries

- Intersection Observer API : For scroll animations
- CSS Variables : For theme switching
- SVG Icons : Inline for performance

Performance Optimizations

- Next/Image for lazy loading
- CSS Grid for efficient layouts
- Minimal JS bundle
- Smooth scrolling behavior
- Optimized animations (GPU-accelerated)

Features Implemented

Core Features

1. Responsive design (mobile, tablet, desktop)
2. Dark/Light mode toggle
3. Smooth scroll animations
4. Form validation
5. Contact form submission handling

Advanced Features

1. Parallax background effects
2. Intersection Observer animations
3. CSS variables for theming
4. Hover animations and transitions
5. Geometric decorative elements
6. Staggered animation delays
7. Custom scrollbar styling

✓ SEO Features

1. Semantic HTML
2. Proper heading hierarchy
3. Meta tags and descriptions
4. Open Graph tags
5. Proper image alt text

Screenshots & Explanations :

Screenshot 1: Hero Section

Explanation:

The hero section features a bold layout with "Design Agency" branding at the top. The main headline "We Design Futures" is prominently displayed with animated geometric shapes in the background. Two call-to-action buttons ("View Our Work" and "Explore Services") are positioned below the tagline. The statistics bar at the bottom showcases credibility metrics. Smooth fade-in animations on load create a professional entrance effect.

Key Points:

- Clean typography hierarchy
- Clear value proposition
- Multiple conversion points
- Professional color scheme

Screenshot 2: Services Section

Explanation:

The services section displays four service cards in a 2×2 grid on desktop. Each card contains an icon, service title, description, and technology tags. The cards are left-aligned with their icons on the left side. When hovering over a card, it lifts up with an enhanced shadow effect, providing visual feedback. The section header "Craft. Strategy. Execution." sets the context for the services below. The light blue accent color throughout maintains brand consistency.

Key Points:

- Clear service categorization
- Easy to scan information
- Interactive feedback on hover
- Professional card design

Screenshot 3: Portfolio Section

Explanation:

The portfolio section showcases 6 projects in a 3-column grid. Each project has a thumbnail image with the project title and category displayed on hover. The dark mode version shows the light blue accent color prominently against the dark background, creating excellent contrast. Images have a subtle zoom effect on hover, and an overlay with the project details appears. The "Work We're Proud Of" headline is clearly visible, with a "Start a project" call-to-action link on the right.

Key Points:

- Professional portfolio presentation
- Dark mode contrast is excellent
- Hover effects enhance interactivity
- Clear project categorization
- Strong call-to-action

Project Structure
